## Academic Project

### Create a messaging mobile app using flutter and dart – Technology Challenge Competition (2022)

This project of Team Mustangs is conducted in order to build A Text Based Chat. Application. The application is required to have the features, Private Messaging, Public Rooms, Group Chatting, User Management Reporting.

The name of the application that we will be creating in this project is “Tweetvio”

### Online Delivery System Platform – Entrepreneurship & Start – up Culture (2020)

#### Stock Auction with Socket Programming (2021)

Java interface design with MySQL database Create an android application using android studio – Mobile Application Development (2022)

Create login screen and registration screen use java as the development language

#### ECommerce-System - <https://github.com/rash0956/ECommerce-System.git>

This website was created by me for the final project of web development course, which is an open online course of the University of Moratuwa, under the "Trainee- Full Stack Developer" program. HTML, CSS, and Javascript languages were used to create it.

#### SOAP - <https://github.com/rash0956/Soap.git>

This SOAP-API was created to convert between different currencies. Basically converts between 50+ different currencies. JSON files are used throughout the entire PHP-based project to store data.

## Extra-Curricular Activity

- SLTC IEEE Gisla 2021 – Design Team
- SLTC Leo Mindset 2021 – Organizing Committee Design Head
